

Intern (Werkstudent) Software Development

Our mission at fulfin is to enable online businesses to grow to their full potential. We integrate with digital marketplaces and third party logistics to offer a unique form of fulfilment financing. Our product allows ecommerce sellers to flexibly and efficiently finance their inventory purchases and make reasonable repayments based entirely on their own success and sales velocity.

The role

Different projects - dependent on your abilities and interest:

- Data Visualization for the risk management module
- Integration of APIs of data providers and 3rd party systems
- Building a superb registration and onboarding process
- Building the core transactional process across all digital touchpoints

Our ask of you

- You are a talented young developer with an entrepreneurial spirit.
- Passionate about in e-commerce, logistics or fintech
- An MSc in Computer Science/Engineering or equivalent experience

Why work with us?

- Work with successful, experienced and networked founders and help build a unique fintech company
- Experience real startup life working in the Werk1 Incubator
- Gain insights into fintech, ecommerce, risk, ML/AI and more

Send your application including your CV or LinkedIn profile to Nathan at talents@fulfin.io
